OBJECTIVE

Computer Science and Business Systems student with hands-on experience in Full Stack Development, Artificial Intelligence, and Machine Learning. Proficient in Python, Java, JavaScript, React, FastAPI, and Flutter, with knowledge of Data Structures and Algorithms, Object-Oriented Programming, DBMS, SQL, NLP, and Data Science. Experienced in developing AI-driven applications, REST APIs, database integrations, authentication, and responsive user interfaces.

EDUCATION

B.Tech – Computer Science and Business Systems

VSB Engineering College, Karur

2027

CGPA: 7.67

Higher Secondary Certificate

Barani Park Matric Hr. Sec. School

2023

76.3%

TECHNICAL SKILLS

Languages: Python, Java, C , JavaScript, Dart

Frameworks/Libraries: React, FastAPI, Flutter, Pandas, NumPy, Scikit-learn

Databases: SQL, PostgreSQL, Firebase

Backend/APIs: REST APIs, JWT Authentication

AI/Data: Machine Learning, NLP, Data Science, Data Analysis

Tools: Git, GitHub, Docker, VS Code

Core: Data Structures & Algorithms, OOP, DBMS, Software Development

PROJECTS

SkillVision-AI – AI-Powered Skill Assessment Platform

- Developed an AI-driven career platform using React, Python, FastAPI, Machine Learning, NLP, and REST APIs for resume analysis and skill-gap identification.
- Implemented career recommendations, personalized learning paths, resume analysis, and AI-based skill assessment.

DiagnoraX – AI-Powered Healthcare Assistant

- Developed an AI healthcare assistant using React, Express, Firebase, and Google Gemini API for symptom analysis and personalized health guidance.
- Implemented authentication, cloud database integration, responsive UI, and AI-based conversational assistance.

The Archive – Full-Stack Text Adventure Game

- Developed a full-stack text adventure game using React and Java Spring Boot with JWT authentication and database persistence.
- Implemented REST APIs, user authentication, game-state management, and persistent data storage.

OpenBlueprint – AI-Powered Architectural Planning Platform

- Developed an AI-powered platform that generates preliminary residential floor plans from plot dimensions, user requirements, and space preferences.
- Implemented intelligent room planning, editable floor layouts, 3D visualization, and preliminary cost estimation to assist users in home planning.

INTERNSHIPS

Machine Learning Intern – Brainery Spot Technologies

- Built and trained Machine Learning models for prediction and classification using Python and data preprocessing techniques.
- Performed data analysis, feature preparation, model evaluation, and optimization to improve model performance.

CERTIFICATIONS

NPTEL – Programming in Java | Coursera – Introduction to Generative AI

Salesforce – Becoming an Agentforce Champion (2025, 2026)

NASSCOM – Introduction to IoT and Digital Transformation | Python Programming

SOFT SKILLS

Problem Solving | Teamwork | Adaptability | Decision Making | Time Management
